Friday, March 13, 2020

In response to the COVID-19 (Coronavirus) epidemic, Mineral Area College will extend Spring Break for students by one week. No classes will be held during the week of March 16-20.

Instruction will move to a virtual format beginning Monday, March 23 through the end of the spring semester. Courses with a lab, clinical, field or performance component will be evaluated for alternative delivery methods. More information will be forthcoming to students via email and MyMac.

Faculty and staff will return and normal campus operations will resume on Monday, March 16. There may be some campus services that are not available at this time. Faculty and staff will use the week of March 16-20 to transition courses to a virtual format for the remainder of the semester.

College Park will remain open and food services will remain operational at this time.

All athletic activities, including practices, are cancelled until April 3. We will reassess athletics at that time.

All other events and activities on the MAC campus are cancelled through the end of the semester. The college will decide at a later date if Commencement ceremonies will be held in May.

Mineral Area College Administration would like to stress that there are no known cases of COVID-19 on our campus. This is a rapidly evolving situation and we are taking proactive steps to protect our students, faculty, staff and community. We will continue to evaluate the situation and work with local and state health officials as new information becomes available.
